Gary –

Based on the information provided during the settlement meeting with Superior Crude, Superior has sold their Barge Company and Trucking/Oil business to another Operator in the Region (I think it was NGL High Sierra Energy) who is operating out of different locations from the old Falcon Refinery. My understanding is Lazarus is now operating some form of crude oil gathering out of the Falcon facility, using the State Air Permits, SPCC/FRP, and USCG approvals held by Superior Crude, under a 120 day agreement with Superior.

Respectfully,
